

SS 600 Serie

To handle higher working loads

High corrosion resistance

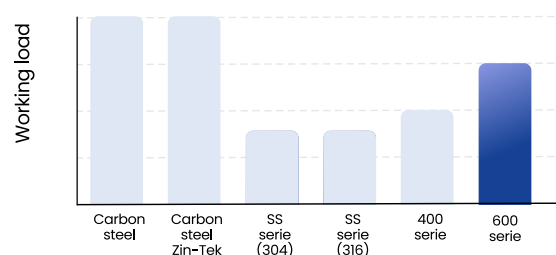

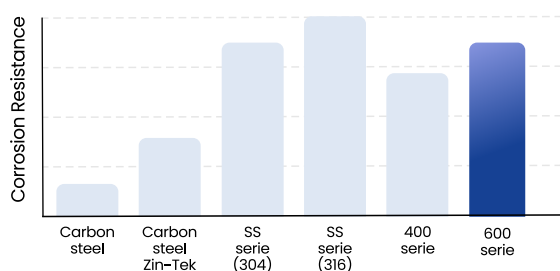

Higher allowed working loads

SS304 plate

Pin, bush, roller from SS 600

SS 600 serie

The Donghua SS 600 serie combines SS304 stainless steel plates for high corrosion resistance with SS 600 pins, bushes, and rollers for improved strength and hardness. This unique combination supports a higher working loads and extends the service life. The SS 600 serie can withstand harsh chemicals, high temperatures and is foodgrade approved.

Technical highlights

- SS630 pin, bush and roller (1.4542)
- SS304 plates (1.4301)
- Temperature range: -40°C to +400°C
- Chains are pre-loaded at 40–50% of the breaking load
- High load capacity: 1.5 times higher maximum allowable load than the SS 300 series
- Extreme long service life
- High corrosion resistance, except in warm chloride environments without adequate protection and saltwater environments
- Pre-lubricated with durable, food-grade NSF H1 wax lubricant
- Lubrication temperature range: -40°C to +120°C
