

SS DT (Dry-Tec)

No lubrication, food and beverage applications

High performance
polymer slide
bearing

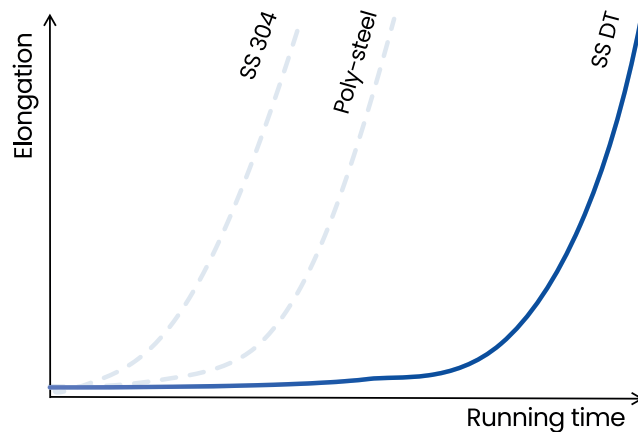

No maintenance

SS304 roller,
pin and plate

Lube free

SS DT (Dry-Tec) serie

The Donghua SS Dry-Tec chain offers maintenance free operation thanks to its self-lubricating plastic slide bearings, which extend the service life by up to 50% compared to standard stainless steel chains. The plate, roller and pin are made from high quality SS304 stainless steel. This chain operates reliably within a temperature range of -40°C to +80°C and is ideal for applications that require regular cleaning with water and detergents.

Technical highlights

- SS304 plate, pin and roller (1.4301)
- High performance polymer slide bearing
- No lubrication required
- Maximum hygiene
- Temperature range: -40°C to +80°C
- Up to 50% longer service life
- Low noise operation
- Ideal for water and detergents
- FDA conform slide bearing on request
